People want more options than surgery and medication to relieve their pain. We offer treatments that do not require surgery or pharmaceuticals, allowing our patients to heal and move through life with ease.

When can I get you in to see a doctor face to face?

Email 2 – Hello, {{contact.first_name}}

Today, our healthcare system offers many procedures to relieve pain. All these procedures can fit into one of the two categories:

Relief Care or **Corrective Care**

✗ **Relief Care**

- ✗ Usually includes a regimen of pharmaceuticals
 - ✗ Provides temporary relief
 - ✗ Does not fix the source of the pain
 - ✗ Mask symptoms, but underlying tissue damage still exists
-

✓ **Corrective Care**

- ✓ Addresses the root cause of pain
- ✓ Heals the source of the pain
- ✓ Encourages the body to heal damaged tissue
- ✓ Provides long-lasting relief

You are in control of your health and healthcare choices.

Would you choose **Relief Care** or **Corrective Care**?

Our doctor's focus on corrective care, providing our patients long-lasting, non-surgical options to relieving their pain.

If you'd like to explore Corrective Care, call to speak with us now XXX-XXX-XXXX

Email 2 – {{contact.first_name}}, when pain becomes chronic, you start to change your life around it.

Have you found yourself...

- Stopping exercising due to pain?
- Second thinking a walk because it is too long?
- No longer playing golf, dancing, or playing sports you used to enjoy?
- Needing help around the house or feel like a burden?
 - Predicting the weather from the ache?
- Losing joy from your life because of the pain?

If you answered YES to at least one of these, we may be able to help!

Our doctors offer treatments that do not require surgery or pharmaceuticals, allowing our patients to heal and move through life with ease.

We start by listening and then go to work, helping you relieve your pain.

Email 4 - Hello {{contact.first_name}},

Our doctors offer a variety of pain relief treatments that have helped thousands of our patients experience long-lasting pain relief.

What type of non-invasive treatments do we offer?

One of the treatments our doctors may recommend is Stem Cell Therapy.

Dr. Shapiro does a good job at explaining Stem Cell Therapy in this [12 minute Ted Talk video](#). Pay careful attention to the story about Dr. Shapiro's friend, who experienced a rotator cuff tear.

Our doctors use this technique to help our patients relieve their pain.

We want to learn about you so we can better treat your pain.

Hello {{contact.first_name}},

Patients want relief. Our doctors have the expertise and experience to provide the care needed to achieve long-lasting relief from their pain. Read what our patient, Robert, has to say about his experience!

“When I went to see Dr. Odulak I could hardly move, literally. Bending down and walking up and downstairs was impossible. With his and his staff’s care, I was fully functional in about 2 weeks.”

– *Robert B. From New York*

Hello {{contact.first_name}}, this is Lisa from {{location.name}}. Are you still in pain? It has been 6-7 weeks since you filled out the {{location.name}}’s pain screening. I wanted to check-in and see if you are still in pain?

If you have not sought treatment and are still experiencing pain, you may be suffering from a degenerative disorder. Pain from a degenerative disorder is not likely to go away by itself.

Do you have a few minutes available to speak about how our doctors may be able to help you with your pain?

Call me at XXX-XXX-XXXX

Final Text – Hello, {{contact.first_name}} this is Lisa with {{location.name}}. It's been a long time since we've spoken. Is your pain any better? We are still here for you. Call me and let's catch up.
